To: All Customers, Sales Representatives and Distributors

Date: May 3, 2019

Subject: Product Marking Process Change for 70 Series I/O Modules

This Product Advisory Notice is to alert you that Grayhill is changing the Product Marking Process on the Plastic housing for all 70 Series I/O modules. ***Please forward this notification to the appropriate person(s) in your organization.***

Description of Change

The product marking process for 70 Series I/O modules is transitioning from a printed ink marking to a laser engraved marking process of the plastic housing of the module.

Reason for Change

This process change was implemented to reduce the environmental impacts of this process on the production line while offering a more permanent product marking for our customers.

Effective Date

Production Units with the new laser etched marking process will be phased into production starting June 1, 2019. I/O Modules with printed product markings will continue to be used in production units after this transition date until the current inventory of printed housings have been exhausted.

Action Required

Please contact your Grayhill, Inc. Business Development Manager or Sales Engineer for further information.
