TE Connectivity Sensors Germany GmbH • Hauer 13 • D-44227 Dortmund

Dortmund, March 3, 2021

Notice of Product Discontinuance

PN: G-NSDMG-023

Description: NS-30/DMG2-U ROHS

Dear Customer,

As we work to scale our business to provide sensing solutions that meet the changing needs of our customers, we have determined it necessary to refine the focus of our applications and technologies, streamline our operations and reduce excess capacity. To increase our operational efficiency, we will cease production in Dortmund in the course of the coming year and have also conducted a strategic review of our product portfolio.

This note is to advise you that TE Sensors is discontinuing the products your company either purchased from us in the past or purchase as of today. The products are scheduled to be phased out by September 2021. We plan to obsolete these products from our systems and dispose of any unique inventory, custom tooling and test adaptors used to make them.

TE Sensors will accept 'Last Time Buy' (LTB) orders for the discontinued part numbers. We will inform you about the exact LTB period in the coming weeks with a Product Termination Notification (PTN). However, we strongly encourage customers to place their orders as soon as possible as demand may increase lead times. LTB orders will be considered non-cancelable, and non-returnable. Lead times are subject to change. Terms and conditions, including warranty information, can be found at TE.com.

If you have any questions regarding the 'End of Life' or the 'Last Time Buy' process, please get in touch with your customer care representative.

Kind regards,

Michael Witt
Managing Director
