

Product Change Notification

Isolator Manufacturing Location Change

Scope of Change Notification

This product change notification (PCN) outlines the change in manufacturing location of isolators.

The Finisar Part Numbers affected by this PCN are:

Product Platform	Finisar Part Number
Free Space Isolator	FIF-***, FIC-***
Receptacle Isolator	FIR-***
Pigtail Isolator	FIP-***

Reason for Change

Finisar is in the process of moving its isolator manufacturing location from current Wuxi location to external contract manufacturers (CMs). The move is to provide necessary expansion and future growth of its operation and product lines.

Detailed Description of Change

Move Isolator line from current Wuxi location to external CMs.

To successfully transfer the equipment and build isolators with the same high reliability with the least risk and impact on isolator supply, the following plan was adopted and is currently being executed.

1. Rebuild the production line at CMs with the same standard as Wuxi facility;
2. Set up production/test stations at CMs, and finish the setup qualification;
3. Build parts for re-qualification;
4. Complete qualification tests and generate a qualification report;

Implementation Date

Several events need to be successfully completed before isolators will be supplied to customer. As such, the date of implementation cannot be firmly defined at this time. It is anticipated that:

- 1) The Finisar qualification report for factory moving will be available in Jan-2017 upon customer's request;
- 2) Isolator production line move will start in the end of Feb 2017;
- 3) Mass production at the CMs will start from March 2017;
