ATTN: Quality/Purchasing Manager
Subject: MASW-002102-13580 datasheet specification update
PCN #: PCN-01375

The goal of MACOM is to continually deliver high quality products and services that meet our customers' needs. We strive to offer products that are industry leading in terms of performance, delivery, quality, and value.

In accordance with MACOM's customer product change policy, this communication is to inform you that MACOM is making a specification update to the part number listed below. You are receiving this notification because you have purchased this product in the past two years.

MASW-002102-13580 – Switch, SPDT HMIC

Through volume measurement data taken over time it has been determined that the absolute maximum bias current per port specification needs to be adjusted from +/- 50 mA to + 30 / -20 mA at +25°C and +/- 15 mA at +85°C. The compatible driver, MADR-011022 is also being added to the datasheet. These changes are reflected in the V8 revision of the data sheet, accompanying this notification.

Please contact your local sales representative if you have any questions or require additional information.

Sincerely,

Paul Wade
